PROJECT REPORT

ON

"MAHARASHTRA NAVNIRMAN SENA"

(Political Party)

Submitted To

Chhatrapati . Shahu Institute Of Business Education And Research

An Autonomous Institute

DEPARTMENT OF COMPUTER STUDIES

In Partial Fulfillment of Degree in

MASTER OF COMPUTER APPLICATION

Semester VI

Submitted by

Mr. Powar Prasad Ashok (Exam No: 8844)

UNDER THE GUIDANCE OF

Mr. Shridhar B. Khot (Tech Lead)

Year 2021 - 2022

Chh. Shahu Institute Of Business Education And Research

An Autonomous College

DEPARTMENT OF COMPUTER STUDIES

CERTIFICATE

This is to certify that, the project entitled **"Maharashtra Navnirman Sena"** submitted by **Mr. Powar Prasad Ashok** in partial fulfilment in **MCA. Part-III (Sem - VI)** to **Chh. Shahu Institute Of Business Education And research, Kolhapur** has been carried out them under our guidance satisfactory during the academic year **2021-22**.
Place: Kolhapur

Date: /   / 2022

Internship Certificate

Date: 24th JUNE 2022.

TO WHOM IT MAY CONCERN.

Re: *Internship Certificate.*

This Certificate is given on this **WFINT22FEB05B- Internship Code** on date of **24th JUNE of the Year 2022** to the student named **Prasad Ashok Powar** of the **Kolhapur Institute of Technology's (Institute of Management Education & Research),Kolhapur.**

Prasad Ashok Powar has successfully completed this **[WFINT22FEB05B]** Internship Period from date **24th FEB 2022** to date **24th JUNE 2022** at **WOLFOX SERVICES PVT. LTD.**, under the carefull guidence of **[EMP-010] Bhagyashri S. Khot, Director & CTO (Chief Technical Officer).**
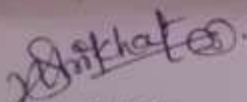

Prasad was able to successfully participate and accomplish the entire task required for this internship, throughout which candidate was able to showcase skills like great work ethic, hard work, leadership, and team player skills.

During this internship period, **Prasad** came across confidential business information. According to this internship offer, candidate acknowledges that he/she must adhere to our confidential policy. In addition, **WOLFOX SERVICES PVT. LTD.** gave a remark that, candidate successfully completed this Internship with given **WFINT22FEB05B**-Internship Code, and also candidate successfully returns all company-owned property, equipment, and documents, including electronic mail or other information.

If you have any questions/query about this Internship Certificate outlined above, please contact us at (+91)9657788775 or admin@Wolfox.in/hr@Wolfox.in.

We are very happy about candidate was joining our team as an **Intern Web Developer** at **WOLFOX!**
We look forward to helping you to achieve your expected career growth. To learn or know more about **WOLFOX**, please visit our website at www.Wolfox.in.

Sincerely,

Shridhar B. Khot,

CEO & Director,
WOLFOX SERVICES PVT. LTD.

1

ACKNOWLEDGEMENT

The satisfaction that accompanies the successful completion of any task would be incomplete without the mention of people whose ceaseless cooperation made it possible, whose constant guidance & encouragement crown all efforts with success.

Although our name appears on the cover of this project, many people had contributed in some form or the other form to this project development. I could not done this project without the assistance or support of each of the following we thank you all.

I am grateful to my project guide, **Prof. Thorat R** for the guidance and inspiration. I express my gratitude to **Prof.Dr Poornima Naik , Head, Department of Computer Studies** for his valuable suggestions & advices throughout the **MCA course**. I also extend my thanks to faculties for their cooperation during my course.

Last but not least I thanks to all our well-wishers and friends who are involved in completion of this project.

Place: Kolhapur

Date: / / 2022

Mr. Prasad Ashok Powar
Exam No : 8844

DECLARATION

To,
The Principal,
CSIBER, Kolhapur

Respected Sir,

I undersigned hereby declared that project is fully designed and developed by me as per curricula of the MCA Computer Studies curriculum of **Chh, Shahu Institute Of Business Education And Research** (An Autonomous College), Kolhapur. The project report entitled "**Maharashtra Navnirman Sena**" written and submitted under the guidance of **Prof. Thorat R.** is our original work.

The empirical findings in the report are based on the data collected by us Preparing Project report. I have not copied from any report I understand that any coping is liable to punish in a way the University authorities deem fit.

Place: Kolhapur

Date: /   / 2022   **Mr. Powar Prasad Ashok**

INDEX

COMPANY PROFILE

Wolfox Services Private Limited is an unlisted private company incorporatedon 28 April, 2017. It is classified as a private limited company and is located in Kolhapur, Maharashtra. It's authorized share capital is INR 1.00 lac and the total paid-up capital is INR 1.00 lac.

The current status of Wolfox Services Private Limited is - Active. The last reported AGM (Annual General Meeting) of Wolfox Services Private Limited, per our records, was held on 30 September, 2019. Also, as per our records, its last balance sheet was prepared for the period ending on 31 March, 2019.

Wolfox Services Private Limited has three directors - Shrikant Balasaheb Khot, Shridhar Balasaheb Khot, and others.

The Corporate Identification Number (CIN) of Wolfox Services Private Limited is U80904PN2017PTC170185. The registered office of Wolfox Services PrivateLimited is at 1767, E WARD, NEAR YASHWANT ACADEMY 3RD LANE,
RAJARAMPURI, KOLHAPUR, Kolhapur, Maharashtra

Introduction

We have made a project of official website of MANSE KOLHAPUR DIST.

Purpose:

Purpose of the project is to make a good official website for MANSE KOLHAPUR because there is no any good website of manse in Kolhapur

Project completion:

This project was a really big task for team of 6 members so as a beginner we took nearly a month to complete this project

firstly, we make a flow of diagram then we divided task in between of six people then we all start working together at WOLFOX Pvt. Ltd. Kolhapur under guidance of Bhagyashree Khot Madam and Shridhar Khot Sir

Challenges:

It was our first project cointaing both frontend and backend so it was very tough for us frontend was little bit easy compare to backend.

We face so many challenges when doing this project we worked hard on this project for making this project as good as possible.

Mostly we had faced problem while doing backend because we have just learned php and my sqli

It was a really tough task for because it was our first live project and we have to complete client demand.

It was totally a new experience for all of us but we had enjoyed it thing our first 10 days goes ln making a good enough user interface.

Background Information :

So literally it was a very big task for us to make a whole website because it was a totally new experience for us we never worked on such a huge project so the site owner literally gave us a bag of information and nearly a 5-6 Gb data folder for making a website.

He provided us all background information so basically Prasad Patil want to make a good website of Manse Kolhapur because their is no any good official website of

manse in whole Maharashtra and he is now PRADESH ADHYAKSH of Kolhapur manse as well as main motive of this to provide a good campaign for Prasad Patil

Creating a strong design for your political website takes research and expertise. Your team likely has many responsibilities they need to devote resources to, and in some cases, delegating website design to a third party professional can be best.

Outline Of Project:

This is a official website of Manse containing whole data so basically we divided task of frontend and backends

Client has given a deadline to us main goal of the project was to make contact of manse official with public by a good website and to solve public problems of whole Kolhapur this is the main moto of making a website we had tried our best to make website good looking and functioning and client liked our website till now we had completed 80% work of our website rest 20% work remaining on backend that we will complete soon.

Website was not only enable to make impact on people, they are also an extremely efficient way to run a political campaign at Kolhapur as well as on state and whole India, and at the same it is helpful to solve people problem through out Prasad Patil and manse official of Kolhapur district

Existing System:

In the existing system the exams are done only manually but in proposed system we have to computerize the exams using this application.

- More man power.
- Time consuming.
- Needs manual calculations.
- No direct role for the higher officials

Proposed System :

The aim of proposed system is to develop a system of improved facilities. The proposed system can overcome all the limitations of the existing system. The system provides proper security and reduces the manual work.

- Ensure data accuracy's.
- Proper control of the higher officials.
- Minimize manual data entry.
- Minimum time needed for t
- he various processing.
- Greater efficiency.
- Better service.
- User friendliness and interactive.
- Minimum time required.

OVERVIEW OF TECHNOLOGIES USED

PHP

PHP: Hypertext Preprocessor, is a widely used, general-purpose scripting language that was originally designed for web development, to produce dynamic web pages. It can be embedded into HTML and generally runs on a web server, which needs to be configured to process PHP code and create web page content from it. It can be deployed on most web servers and on almost every operating system and platform free of charge.

PHP was originally created by Rasmus Lerdorf in 1995 and has been in continuous development ever since. The main implementation of PHP is now produced by The PHP Group and serves as the de facto standard for PHP as there is no formal specification.PHP is free software released under the PHP License, which is incompatible with the GNU General Public License (GPL) because of restrictions on the use of the term PHP

PHP has evolved to include a command line interface capability and can also be used in standalone graphical applications.

USAGE

PHP is a general-purpose scripting language that is especially suited for web development. PHP generally runs on a web server. Any PHP code in a requested file is executed by the PHP runtime, usually to create dynamic web page content.It can also be used for command-line scripting and client-side GUI applications. PHP can be deployed on most web servers, many operating systems and platforms, and can be used with many relational database management systems. It is available free of charge, and the PHP Group provides the complete source code for users to build, customize and extend for their own use.

PHP primarily acts as a filter, taking input from a file or stream containing text and/or PHP instructions and outputs another stream of data; most commonly the output will be HTML. Since PHP 4, the PHP parser compiles input to produce bytecode for processing by the Zend Engine, giving improved performance over its interpreter predecessor

About HTML

HTML, which stands for Hyper Text Markup Language, is the predominant markup language for web pages. It provides a means to create structured documents by denoting structural semantics for text such as headings, paragraphs, lists etc as well as for links, quotes, and other items. It allows images and objects to be embedded and can be used to create interactive forms.

It is written in the form of HTML elements consisting of "tags" surrounded by angle brackets within the web page content. It can include or can load scripts inlanguages such as javascript which affect the behavior of HTML processors like Web browsers; and Cascading Style Sheets (CSS) to define the appearance and layout of text and other material. The W3C, maintainer of both HTML and CSS standards, encourages the use of CSS over explicit presentational markup.

Hyper Text Markup Language(HTML) is the encoding scheme used to create andformat a web document. A user need not be an expert programmer to make use of HTML for creating hypertext documents that can be put on the internet.

Most graphical e-mail clients allow the use of a subset of HTML (often ill-defined) to provide formatting and semantic markup not available with plain text. This may include typographic information like coloured headings, emphasized and quoted text, inline images and diagrams. Many such clients include both a GUI editor for composing HTML e-mail messages and a rendering engine for displaying them. Use of HTML in e-mail is controversial because of compatibility issues, because it can help disguise phishing attacks, because it can confuse spam filters and because the message size is larger than plain text.

NAMING CONVENTIONS

The most common filename extension for files containing HTML is .html. A common abbreviation of this is .htm, which originated because some early operating systems and file systems, such as DOS and FAT, limited file extensionsto three letters.

HTML APPLICATION

An HTML Application is a Microsoft Windows application that uses HTML and Dynamic HTML in a browser to provide the application's graphical interface. A regular HTML file is confined to the security model of the web browser, communicating only to web servers and manipulating only webpage objects and site cookies. An HTA runs as a fully trusted application and therefore has more privileges, like creation/editing/removal of files and Windows Registry entries. Because they operate outside the browser's security model, htas cannot be executed via HTTP, but must be downloaded (just like an EXE file) and executed.

From local file system

ABOUT JAVASCRIPT

Javascript is an object-oriented scripting language used to enable programmatic access to objects within both the client application and other applications. It is primarily used in the form of client-side javascript, implemented as an integrated component of the web browser, allowing the development of enhanced user interfaces and dynamic websites. Javascript is a dialect of the ecmascript standard and is characterized as a dynamic, weakly typed, prototype-based language with first-class functions. Javascript was influenced by many languages and was designed to look like Java, but to be easier for non-programmers to work with.

PROTOTYPE-BASED

Javascript uses prototypes instead of classes for inheritance. It is possible to simulate many class-based features with prototypes in javascript.

Functions double as object constructors along with their typical role. Prefixing a function call with new creates a new object and calls that function with its local this keyword bound to that object for that invocation. The constructor's prototype property determines the object used for the new object's internal prototype.
Javascript's built-in constructors, such as Array, also have prototypes that can be modified.

Unlike many object-oriented languages, there is no distinction between a function definition and a method definition. Rather, the distinction occurs during function calling. When a function is called as a method of an object.

USAGE

The primary use of javascript is to write functions that are embedded in or included from HTML pages and interact with the Document Object Model (DOM) of the page.

Because javascript code can run locally in a user's browser (rather than on a remote server) it can respond to user actions quickly, making an application feel more responsive. Furthermore, javascript code can detect user actions which HTML alone cannot, such as individual keystrokes. Applications such as Gmail take advantage of this: much of the user-interface logic is written in javascript, and javascript dispatches requests for information (such as the content of an e- mail message) to the server.

The wider trend of Ajax programming similarly exploits this strength. A Javascript engine (also known as javascript interpreter or javascript implementation) is an interpreter that interprets javascript source code andexecutes the script accordingly.

The first javascript engine was created by Brendan Eich at Netscape Communications Corporation, for the Netscape Navigator web browser.
A web browser is by far the most common host environment for javascript. Web browsers typically use the public API to create "host objects" responsible for reflecting the DOM into javascript.

ABOUT mysql

Mysql Introduction

There are a large number of database management systems currently available, some commercial and some free.

Some of them : Oracle, Microsoft Access, Mysql and postgresql.

These database systems are powerful, feature-rich software, capable of organizing and searching millions of records at very high speeds.

Understanding Databases, Records, and Primary Keys Every

Database is composed of one or more tables.

These Tables, which structure data into rows and columns, Impose organization on the data.

The records in a table(below) are not arranged in any particular order.

To make it easy to identify a specific record,therefore, it becomes necessary Standing Relationships and Foreign Keys(RDBMS)

You already know that a single database can hold multiple tables.

In a Relational database management system(RDBMS), these tables can be linked to each other by one or more common fields, called foreign keys.

What is Database administrator(DBA) ?

Database administrator is the super user of database, he has unrestricted rights and privileges to access database, grant permission to other database users.

What is Database user(DBU) ?

Database user is the person who uses the database in a restricted privileges,provided by database administrator.

System Analysis:

System analysis is a process of gathering and interpreting facts, diagnosing problems and the information about the project to recommend improvements on the system. It is a problem solving activity that requires intensive communication between the system users and system developers. System analysis or study is an important phase of any system development process. The system is studied to the minutest detail and analyzed. The system analyst plays the role of the interrogator and dwells deep into the working of the present system. The system is viewed as a whole and the input to the system are identified. The outputs from the organizations are traced to the various processes.

System analysis is concerned with becoming aware of the problem, identifying the relevant and decisional variables, analyzing and synthesizing the various factors and determining an optimal or at least a satisfactory solution or program of action. A detailed study of the process must be made by various techniques like interviews, questionnaires etc. The data collected by these sources must be scrutinized to arrive to a conclusion. The conclusion is an understanding of how the system functions. This system is called the existing system.

Now the existing system is subjected to close study and problem areas are identified. The designer now functions as a problem solver and tries to sort out the difficulties that the enterprise faces. The solutions are given as proposals. The proposal is then weighed with the existing system analytically and the best one is selected. The proposal is reviewed on user request and suitable changes are made.

This is loop that ends as soon as the user is satisfied with proposal. Preliminary study is the process of gathering and interpreting facts, using the information forfurther studies on the system. Preliminary study is problem solving activity that requires intensive communication between the system.

Limitations

- Internet Dependency
- The size of the database increases day-by-day, increasing the load on the database back up and data maintenance activity.

Conclusion

Conclusion of the Project Maharashtra Navnirman Sena:

Our project is only a humble venture to satisfy the needs to manage their project work. Several user friendly coding have also adopted. This package shall prove to be a powerful package in satisfying all the requirements of the users. The objective of software planning is to provide a frame work that enables the manger to make

At the end it is concluded that we have made effort on following points…

- The description of Purpose, Scope, and applicability.
- We define the problem on which we are working in the project.
- We describe the requirement Specifications of the system and the actions that can be done on these things.
- We understand the problem domain and produce a model of the system, which describes operations that can be performed on the system.
- We included features and operations in detail, including screen layouts.
- We designed user interface and security issues related to system.
- Finally the system is implemented and tested according to test.

Future Enhancement

- We will also include the new modules in next version.
- Solve all the limitations and drawbacks of the project.
- In this website we will take Extra Activities Added .
- Spend less time running official Website
